

# EVEN ORDERING IS EASY...

## Order one of these 3 ways...take your pick...

### 1. Phone Freecall 1800 12345 7

Call any day or early evening, ask any questions to clear up anything you aren't quite sure about then we'll take your contact details and post out your order within a couple of days. You can pay by credit card to finalise it then and there... or we'll send an invoice so you can send us a cheque or Money Order.

### 2. On-line... if that's what you prefer

You can email us or go to our website [www.termitetrap.com.au](http://www.termitetrap.com.au) and do the ordering with a few clicks using your credit card or PayPal.

### 3. Post or Fax... if that's what you're used to...

You can fill in your contact details right here and post or fax to us with your cheque, money order or credit card numbers

TermiteTrapP/L

Phone number.....

Visa or MasterCard numbers.....Valid until.....

## Deciding what to order...

A carton of TermiteTraps contains 6 stations, usually sufficient for townhouses or homes on 500-600 sqm blocks. If you have a bigger block, more buildings or more termite challenge, consider buying a second carton of 6 because the more Traps you have around, the more likely and sooner you could expect to intercept foraging termites. You might have investment properties or want to share 4 or more cartons with friends, neighbours or relatives...and save!

A 500g treatment pack is usually sufficient to kill a couple of small colonies or a large colony. Do you suspect more action? The 1kg saves you some money.

The text book: *Termites&Borers; a homeowner's guide to detection and control* contains 80 fully illustrated pages of info on how termites sneak around your backyard, how they try to get into your house and what else you can do to prevent that happening.

- 1 carton    \$220
- 2 cartons    \$440
- 4 cartons    \$720 or \$180 a carton

If you buy multiple cartons you will automatically receive a free copy of the text book: *Termites & Borers, a homeowner's guide to detection and control...* Save \$20

- 500g Treatment Pack    \$150
- 1 kg Treatment Pack    \$250
- Refills (6 cardboard tubes)    \$44
- Termites & Borers book    \$25  
If ordered and posted separately
- Termites & Borers book    \$20  
If ordered with a carton of Traps

Total \$.....

(We'll phone you to confirm)

# LIKE SOME REASSURANCE?

## First, a couple of testimonials...

Dear Ion,  
Who on earth would be delighted to find termites?  
Well, I was. One of the TermiteTraps I bought in July 2008 had the hole covered!

For the first time in years and after many endeavours to find and kill termites at my house, I feel that a system is working! The Traps and baiting procedure are easy to use and I could not recommend this system more. Thank you very much. Sincerely,

Margaret, HARVEY, WA Jan 09

Dear Caroline and Ion, being on the land, I've had a bit of experience with termites and also with professional pest controllers which in the main have been decent, well trained blokes. But when it comes to the cost of treatment, your TermiteTrap system is so cost effective compared to professional pest controllers. Your information pack and your website made it seem easy for me to do the whole thing myself. But the reason I'm writing this is, when I phoned, you both took the time to explain in simple language the non-toxicity of the treatment and how to check some of the big old gum trees near the buildings. Now that I've actually received my TermiteTraps and 'planted' them I really appreciate the quality, the simplicity and feel very confident and understand why you say... "paying more money doesn't kill termites any deader than dead".

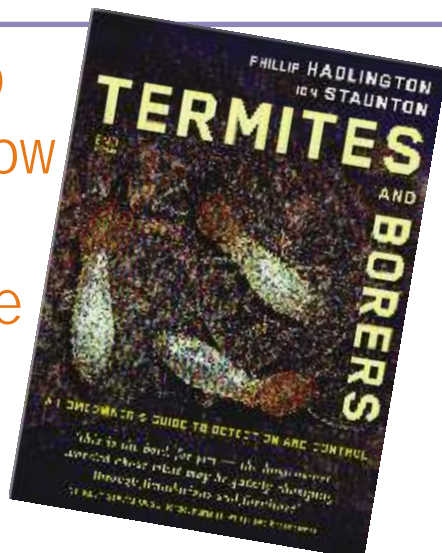

In Appreciation,

Doug and Pam [www.bottletrees.info](http://www.bottletrees.info) Ph:1800 201 567

Every day, customers who have bought TermiteTraps, weeks or even months before, phone us to order a Treatment Pack because termites have found a Trap and signaled their arrival. They wouldn't be phoning if the Traps weren't intercepting the termites in their backyard! The treatment part of the process is then almost foolproof!

## \$20 is not a lot to pay to find out how to stop termites eating your house

It's an 80 page, fully illustrated homeowner's guide to understanding how termites sneak around your backyard, how they could get into your home and what to do about it.

## The inventor...

Who is he?

What's he know?

What's he done?

I started as a pest control technician with cobwebs in my hair from slithering under low houses investigating and treating termites. After Tech and Uni courses gave me the title 'Entomologist', I began teaching and co-wrote the first industry text book and correspondence course. For 25 years I was national Secretary of the pest management industry and I was beginning to think about retiring when UNSW Press asked me to revise and rewrite the three industry training textbooks. (All this isn't to brag; it's just so you'll conclude I know a thing or several about termites).

Well, then things really changed. A friend asked me how to help him eliminate any termites colonies that might be in his backyard before they got into his house... "Sure" I said and began devising a combination monitoring and treatment station that he could check for himself instead of him calling for me come and to do it.

How these Termites Traps work is covered in the accompanying information....and work they do!

If you already have live termites in your house, please phone me for advice. You may be able to d-i-y inside.

Well over 90% of colonies that attack houses come from surrounding areas; what I can claim is a very high probability that termite colonies will find at least one of your Traps. You can kill off colonies in months whereas it takes 2-4 years for a colony to develop into a significant threat.

It's easy to see why I changed my focus to help the millions of homeowners who are hoping that termites will not cost them \$thousands... perhaps you'll be the next one I can help.

Ion Staunton  
Inventor

There's stuff on termite biology and habits and the various options you have in protecting your house. You'll learn how to do your own inspections, where to look and what to look for.

And, if you decide to call in a professional, you'll be able to better understand and make informed decisions on their treatment proposals. You'll learn how to decide which treatment options to accept and which are of less importance (saving you money).

- \$20 if ordered with a carton of Traps, or
- FREE if you order 2 or more cartons.
- Ordered alone, \$25 to cover Postage
